Subject: Advice on data transfer -- PC to Sun
Posted by jeyadev on Mon, 24 May 2004 20:14:28 GMT

Not a IDL or Wave question, but this seems to be a forum where
others have run into this problem.

For the first time, I have to deal with largish chunks of data
produced on a Windows box and written into binary files. I need
to move them to my Sun (Solaris 8) box. Any suggestions on what
would be the "best" way to do it? Just converting the PC files
to ASCII and moving them over is what I have in mind right now.
The data in intended to be analysed (on the Sun) using PV-Wave.

thanks
