The key to getting perfect publication quality output from IDL is to not \*look\* at the output until it is printed. :-)

If you look at it before it is printed you just get migraine headaches. But here is an article that describes how some people solve the preview puzzle.

[http://www.dfanning.com/tips/postscript\\_preview.html](http://www.dfanning.com/tips/postscript_preview.html)

Cheers,

David
