Hi Edwin,

assuming you're using windows, I've posted a DLL at:

<http://people.uleth.ca/~brad.gom/fileio/FileIO.zip>

I think I wrote this for version 5.0. There are wrapper procedures for copying, moving, deleting and renaming files, as well as creating and deleting directories, reading the file date, and checking the free disk space. I never got around to turning it into a DLM (there is no need since version 5.6.), but it should work. Another option would be to use SPAWN.

Brad
