---

Hello,

I need help setting up a secondary dotted line grid, while at the same time having a primary solid line grid. The secondary grid should be taking the place of the small tick marks. I am new to IDL so if anyone could help me I would appreciate it.

If anyone has simple programs they would like to send to sort of teach me a little more about what I could do in IDL with plotting I would appreciate it as well.

Thanks for all of your time and co-operation.

Yvonne
