Yeah, I'll have to, I downloaded it yesterday, and the install failed, and
I had downloaded it again this morning (on a different comp), and just
this minute had the install fail again. ARGH! something is kinda goofy on
that computer, perhaps I have a hardware problem.

I'm certain there are some CDs laying around here with the VM.
I'll have to check the coasters on the coffee table, and the dog frisbees. :)
