Subject: polygon filling - binary image
Posted by Francois on Wed, 23 Jun 2004 15:54:10 GMT

Hello,

I have a binary image with lines (255) and background (0).
I would like to fill areas closed by lines with a unique ID.
Hence obtaining an image with grey levels going from 1 to
number_of_polygons.

Do you have any hints about how to do this ?

Thank you,
