Hi,

I have given the dataset,

Lat	Lon	ratio
-----	-----	-------

58.41	9.03	1.1
-------	------	-----

58.60	9.10	1.3
-------	------	-----

58.64	9.15	1.5
-------	------	-----

58.75	9.21	1.6
-------	------	-----

...

and I want to overlaying these data on a map projection. I think, at first I have to create a rectangle dataset with lower left corner (latmin,lonmin) and upper right corner (latmax,lonmax). How can I do this?

The next steps I have found at D. Fannings webpages: [Overlaying an Image on a Map Projection](#).
