```
    Hi:
    ...
    I am using psym=-1 as an option of PLOT (or OPLOT), which
    should connect all the data points.
    Why is this not the case?
    Thanks in advance. Andreas
    Hi,
    Plot won't connect the points if the values are not valid numbers (e.g. !values.f_NAN)
    so
        a=findgen(100)
        a[20:30]=!values.f_nan
        plot, a
    ;
```

gives you a diagonal line with a gap between 20 and 30. Try PRINTing the data, it may be that you took the square root of a negative number, or read in a string as a floating point value.

Chris.
