Oh, oh. If anyone cares about this besides Wayne, you should know that I made the fix on Friday to an old version of FSC_FileSelect. I have procedures in place that are suppose to prevent this, but...what can I say...computers!

Anyway, Wayne kindly pointed out the problem to me this morning and I have just now put the proper file on my web page. If anyone has downloaded this file the past couple of days, they should probably do it again. Sorry. :-(

http://www.dfanning.com/programs/fsc_fileselect.pro

Cheers,

David
