Hi,
here are my results, (win2000 idl 6.0, 512mb ram, 1gb swap,
usage peaked at ~750 mb)

Weird!

% Compiled module: \$MAIN\$.

IDL> .GO

112.00000

112.00000

0.00000000

IDL> .GO

0.00000000

0.00000000

0.00000000

I haven't even looked into it, i might have some time tomorrow.

Cheers,
bob
