Hi everyone,

This one's got me stumped (again). The code

```
base = widget_auto_base()
wg = widget_slablel(base, prompt = ' ')
result = auto_wid_mng(base)
```

gives me the error messages

```
% Expression must be a structure in this context: INFO.
% Execution halted at: AUTO_WID_MNG.
```

Can someone tell me where INFO is coming from and what I'm doing wrong? I'm using ENVI 4.0 / IDL 6.0.

Many thanks

Mort Canty
