Subject: GUI parameter passing :NEWBIE

First off I'm a NEWBIE to IDL application programming.

I'm developing a GUI application in IDL. All I want to do is pass
variables from one Dialog window to another, but can not figure out
how to do this. For example GUI1 has a BUTTON Widget and in the
ONButtonPress event handler I call GUI2 (GUI2,GROUP=Event.top) which
launches GUI2, however I need to pass some values from GUI1 so that
they can be inserted into GUI2's text widgets.

Thanks
Kevin
