Subject: working dir with virtual machine
Posted by Gert Van de Wouwer on Tue, 03 Aug 2004 09:57:23 GMT

Hi,

I am running IDL 6.0 under Win2K and am trying to install an app on a
different machine.
When I open the Virtual Machine, then move to the folder where my .sav file
is, the working directory still is set at the IDL program path (and i cannot
find my ini files that are in the same fodler as the sav file). Is there a
way to find out what file my sav file is in?

best regards,

Gert
