Yes, absolutely anyone can.

Cheers,
bob

PS so as not to be %100 smartass,
the r g b colors are:
color[0]   = yellow = [255,255,0]
color[64]   = green = [0,255,0]
color[128] = blue =   [0, 0,255]
color[192] = red =   [255,0,0]
color[255] = white = [255,255,255]
and just ramp the numbers between for each component.
