Say what!?

How about:

```
SAVE, array
```

Or:

```
OpenW, lun, 'myarray.dat', /Get_Lun  
WriteU, lun, array  
Free_Lun, lun
```

Or, if you are going the other way (I can't really tell):

```
OpenR, lun, 'whateveritscalled.dat', /Get_Lun  
array = BytArr(1080,540)  
ReadU, lun, array  
Free_Lun, lun
```

That about covers the usual suspects. Any of those do it for you?

Cheers,

David
