Subject: TVimage and PlotS Posted by James[1] on Thu, 26 Aug 2004 08:05:50 GMT View Forum Message <> Reply to Message

Hi everybody,

Perhaps you can help me. The problem is - I want to display an 2D-image and then overplot the data using PlotS. It looks like that:

TVIMAGE, image, POSITION=pos, /KEEP\_ASPECT\_RATIO PLOTS, X,Y, COLOR=100

. . . .

I tried to apply DATA or DEVICE keywords but without success. How to make the data perfectly fitted with the image?

Thanks, James
