Howdy,gurus

I am using CONTOUR command to plot a reciprocal space map.

1.How can I remove all of the tick names (labels)and make the map fill in the output window (no margins)?

2.How can I control the exact print size of the output box,say,5 by 4 inch?

I'll use WRITE\_TIFF command to export the map in the output window and imbed it into a PageMaker file so I need to control the size of that map.

Thank you for your help!
