Hello there!

I'm using the following code to generate a JPEG of an image. The figure is generated in black and white format. Does anybody know how can I generate a colored image?? (e.g. using a color table).

Thanks!

```
image=[(ndvi)]
ndvi_jpg='ndvi.jpg'
ndvi = HIST_EQUAL(ndvi, percent=2)
WRITE_JPEG, ndvi_jpg, ndvi, QUALITY=100, order=1
```
