Does anybody also know of a "hilite" setup for IDL in Emacs - one that will
show my wonderful program in pretty colours?

This is pretty useful for at times for tracking down where loops
start and end, etc. more easily (at least I find so when using
in for C and FORTRAN code).

Thanks

Tim

: Actually, the directory is idl_emacs.

: Specifically, use anonymous FTP to fermi.jhuapl.edu, cd to idl_emacs,
: and you will find the files idl-shell.el and idl.el in that directory.

: Or via the WEB:

: ftp://fermi.jhuapl.edu/pub/idl_emacs

: Chris

: P.S. idl-shell.el is at version 1.20 and idl.el is at version 1.17.
