Subject: Project files
Posted by Neil Talsania on Tue, 19 Oct 2004 08:08:16 GMT

I am trying to configuration manage a set of .pro files and the
corresponding project file. However, the project file seems to include the
full path. So when another developer opens up the project, he is actually
looking at my copy of the files, not his own. Does anyone know a way around
this?

Thanks
Neil
