Wierd, the plot gets thicker. I must have made my own version of textoidl some time ago.

In textable.pro, I added one symbol to the last table, after \circ:

```
...
[ '\circ',      "%" , string(byte(176)) ],$
[ '\odot',      'n' ,      'O'      ]$
```

and that did the trick. I should have sent something to Matthew Craig.

Craig
