Please don't take this too hard, Pravesh, but you *\*really\** need to work on your newsgroup-posting technique. As others have pointed out, you haven't given enough information for anyone to *\*begin\** to think about an answer. Your previous postings have also been exasperatingly uninformative.

I suggest you read this essay:

<http://www.catb.org/~esr/faqs/smart-questions.html>

(Note that it is directed towards people who are trying to solve computer problems and doesn't exactly fit your case, but it contains lots of good advice nonetheless.)
