---

Greetings all,

I'm an IDL programmer at National Marine Fisheries and was wondering if anyone has had any experience using an NVIDIA Quadro FX 4000 card with IDL. We're looking for a workstation card due to the graphically intensive programs we hope to write down the road. It supports OpenGL, and we're hoping to also use it under linux so if anyone also happens to be using linux, IDL and said card or even earlier models of the Quadro FX line... (yeah, I know, probably pretty unlikely), any real world info would be helpful.

Thanks,  
Robert Gamble
