Oh, it is all ready to be released. I'm just waiting because
I want to release it simultaneously with my new book on
object programming in IDL. :-)

Cheers,

David

P.S. In other words, I wouldn't be holding my breath. :-)

P.S.S. Actually, I have been using the Library quite a lot,
and clients have been using it successfully. But if I released
it to the public, I'm pretty sure I could forget about tennis
and become a one-man, unpaid support person. The alternative,
of course, is to become a one-man, unpaid technical writer, but
that doesn't sound all that attractive either. :-(
