Hi,

anybody has get problems with XML files WITH ACCENTS in Linux??

I have a XML catalog file with some text writting in "catalan" an "sapnish". This languages use accents. My problem is that both in Solaris and Windows the IDLffLangCat object or an IDLffXMLSax object parse the file ok.

The problem is with Linux. I have seeing the LANG environment variable but is the same in solaris and linux.

Any idea?

Thanks.
