Hi all,

the solution to this problem is to use print inside an <IDL> block.

In fact, something like

```
a=99.99
```

```
print, '<ION_EVALUATE EXPR="$ciccio=' + string(a) +"'>'
```

does not print anything, but is interpreted as a meta-command.

So,

```
print, [$ciccio]
```

shows, in fact, 99.99

Regards,

Ale
