Hello everybody,

just to ask the same question of my previous post in a simpler way:

is it possible to assign to an ION_SCRIPT \$variable a value coming from the result of an IDL expression?

Something like (inside an <IDL> block of course)

```
<ION_EVALUATE EXPR="$var = strmid('alessandro', 1, 5)" />
```

or

```
$var=strmid('alessandro', 1, 5)
```

???

Thank you very much for any help

Ale
