
Subject: Support for getting HTTP/FTP clients into IDL

Hi All,

I've just submitted a request to RSI that they consider incorporating an HTTP/FTP client into the core of IDL.

And surprise, apparently I'm the very first to request this!!

Now I know there's more than a few folk out there who valiantly use the Socket command to access data and or pages on the 'net. How about sending off an email to support@rsinc.com, adding your support for these two requests?

Make sure you say **why** you'd like to see a nice, full implementation of http/ftp in IDL, how you'd use it, and how many IDL/ENVI users in your facility would be keen to use it.

Here are the official names of the Requests in RSI's system :-

C.R.I.D. #39054 (" REQUEST: Add To IDL A Library Of HTTP Client Functions")
and C.R.I.D. #39055 (" REQUEST: Add To IDL A Library Of FTP Client Functions").

Cheers,

Andrew Cool
