In PV-Wave you get the widget ID of the menu item and use it in a WwSet to gray it out.

Example:

menuid = WwMenuBar(parent,items,Menus=menus)
itemids = WtGet(menus(i),/Child) ; i=menu from menubar
status = WtSet(itemids(j),/Nonsensitive) ; j=the index of item from
menu i

Hope this helps, -Andy
