Nuts!

I got the message today (found it in my spam filter, alas!) about
the iTool Challenge, and a chill went down my spine. My chance
to *really* learn about iTools! Maybe with some help I could
get them to work for me.

So I immediately registered for the prize and clicked on the
Download Tutorial One button:

  "Page Not Available. The page you requested is no longer
   available."

What!? It's the first day!

 Clicked on the Download Tutorial One Data Set button:

  "Page Not Available"

Either the people at RSI surreptitiously read this newsgroup
and are filtering me out, or I'm having another bad experience
with iTools. :-(

Please, RSI, help me win the free T-shirt!!

Cheers,

David
