Subject: Update Mandrake from 10.0 to 10.1 and nothing work again
Posted by antoine.cottin on Wed, 26 Jan 2005 22:10:35 GMT

Hi,

I upgrade my Mandrake Linux system from 10.0 to 10.1 and when i try to
install ENVI 4.0 again it doesn't work.

When i type in a shell as root:

/bin/sh /mnt/cdrom/xinstall.sh

After choosing the directory and the differents options of the
installation,
the install process start and i've got the following error:

"The script /usr/local/rsi/idl_6.0/bin/post-unpack was not found. There
may be errors setting up the product environment".

But when i shearch for the directory idl_6.0 it's even exist !

Do you have any clues of what going on ? because when i install it on
the Mandrake 10.0 everythings goes find !
Do i have to modify something in the xinstall.sh script ?
Thank's in advance

Antoine
