Subject: copying text to the system clipboard
Posted by Benjamin Hornberger on Fri, 18 Feb 2005 18:29:00 GMT

Hi all,

is it possible to copy text from an IDL variable to the system
clipboard? Specifically, I would like to copy a string array into a
multi-line text which can be pasted into Notepad or wherever.

I found David's 'clipboard' routine, which does it for graphics windows.

Thanks for your help,
Benjamin
