
Subject: Simple typo in iTools manual

I'm just beginning to play with iTools here. There's an example in the itooldevguide.pdf on page 395 which uses the IDLitParameter::QueryParameter method. The example incorrectly uses

```
oPlotParams = oPlot->QueryParameters(COUNT=count)
```

adding an extra "s" to the method name. It should be:

```
oPlotParams = oPlot->QueryParameter(COUNT=count)
```

Cheers,
JGG.
