Hi,

I've packaged together the code that I use to create and send DICOM images containing plots, images and tabulated data. The formal release will be via the ANZSNM (Australian and New Zealand Society of Nuclear Medicine) at <http://www.anzsnm.org.au/ftp/idl/> but for now I have a preliminary release at

<http://www.zipworld.com.au/~retsil/idl/snaptools0.1b.zip>
<http://www.zipworld.com.au/~retsil/idl/snaptools0.1b.tar.gz>

Documentation is at

<http://www.zipworld.com.au/~retsil/idl/snaptools/doc/>

This package requires the DICOM toolkit from OFFIS software (<http://dicom.offis.de/>).

Cheers,

Robbie
