```
case x of
  0: do_this()
  1: do_that(x)
  2: do_that(x)
  3: do_that(x)
  4: do_that(x)
  5: do_that(x)
  6: do_that(x)
  7: do_that(x)
  8: do_that(x)
  9: do_that(x)
 10: do_something_else()
 11: do_something_more()
endswitch
```

Is there a way to group 1 - 9 into a single expression rather than having to list each distinct number in the range?

-Mike
