Subject: xyouts precision Posted by Krista on Thu, 03 Mar 2005 21:06:00 GMT View Forum Message <> Reply to Message

Hello All,

I am trying to add a second label to the y-axis of a plot using xyouts. However, the units of my x-axis are in Julian days and xyouts will not let me place my label more precisely than one decimal point. Is there a way to get a more precise placement or a better way to add the second label? Thanks.
