Hi,

Have the Days_of_Week or Months keywords with Widget_Table been fixed in 6.1?

I have tried it with 5.2, 5.5, and 6.0, but only 5.2 works correctly

Test:

```
months = ['A', 'B', 'C', 'D', 'E', 'F', 'G', 'H', 'I', 'J', 'K', 'L']
days = ['zero', 'one', 'two', 'three', 'four', 'five', 'six']
format = ['(C(CDwA))', '(C(CMoA))', '(C(CDI))', '(C(CYI5))']
data = [0, 0, 0, 0]
base = Widget_Base()
table = Widget_Table(base, Format=format, Days_of_Week=days, $
                     Months=months, value=data)
Widget_Control, base, /realize
```

Result:

It should have a row with (as in 5.2): two, A, 1, -4713

Instead, it has a row with (5.5 & 6.0): Mon, Jan, 1, -4713
