Subject: problem with xroi
Posted by Pravesh on Wed, 06 Apr 2005 15:57:49 GMT

Hello:

2 problems:

1. I have medical images in GE Format. As IDL cannot open it, I tried
to act smart and converted them to JPG. The trade-off being that I have
grayscale images.

I was wondering if we have an image reader for the GE Format otherwise
how can I work around this problem?

2. xroi seems to be opening up filtered images in a weird way. while i
am able to pull up the same filtered images perfectly well in a normal
window, xroi does not display the images as the regular window does..

all i am doing to the image before pulling up is inverting it and
LPFing it.

Any inputs are appreciated

thanks,,
Pravesh
