Subject: Session timeouts in IDL?

Hello All;

IDL licenses are more valuable than gold in my department and right now, next years budget looks pretty flat. I was hoping that one of the ways we could maximize our licenses would be to have some sort of session timeout that would automatically log users out after a pre-determined idle time. However, I do not see an easy way to do that. Is there something I missed? Does anyone have any suggestions?

Thanks

FSD
