```
IDL> print,288*180
-13696
IDL> print,long(288*180)
-13696
IDL> print,ulong64(288*180)
18446744073709537920
IDL> print,288.*180
51840.0
```

I just want to multiply two integers! Is that so wrong?
