Hi,

I am not a regular reader of this newsgroup (I know I should but ...).
I have a customer who has HDF files with Scientific Data Sets in it
and he would like to read them into IDL or PV-Wave without having to
translate them. I checked the FTP sites idlastro.gsfc.nasa.gov and
boulder.colorado.edu and didn't see anything I thought was appropriate.
So does anyone have such a beast? Please send email and I will post
a summary (assuming I get a useful response).

B Cing U

Buck
