Works fine for me, running IDL 6.1 on Mac OS X 10.4 on my Powerbook.
I did an Archive & Install installation and then manually moved my
IDL over from the archived /usr/local into the new one, but didn't
reinstall IDL specifically.

Bugs can be filed at bugreporter.apple.com, though you'll need an
Apple Developer Connection login. Those can be had for free for students,
not sure whether they charge those of you with real jobs. ;-)
