Subject: Tapping into IDL help??

Posted by schieb on Thu, 01 Jun 1995 07:00:00 GMT

I'm getting the impression that we will no longer be able to
add our help items to the general IDL help under the new 4.0
like we could under 3.6. This is very disheartening. Using
the old help for our stuff and the newer help for everything
else is not acceptable. There *must* be a way...and short of
paying huge royalties to MASTERGRAFX (?) or whatever PC-type
software company built the help. Does anyone know of any
solutions for adding your help? I was hoping the new version
would make things better, not worse...
