Subject: help: window content erased after resize
Posted by Chi-Kuei Wang on Tue, 24 May 2005 22:28:19 GMT

Hi,

   After plotting a simple curve in a window, when I resize the window
(using cursor), the window content is erased by the window border. Is
there a way to sync the size the window and the size of the content inside?
   I remember some time ago I found and answer. Since I haven't used IDL
for a while, I just can't find the answer.
