Subject: delete variable name from memory
Posted by saplizki on Thu, 02 Jun 2005 12:10:02 GMT

I need to delete my variable from the variable name list.
but i don't locate at the top level (i'm in a gui program) so i can't
'delvar' it.
also i can't (don't want to) zero it because it won't remove from the
variable list (when i press help or use ROUTINE_NAMES or ROUTINE_INFO)
and i use that list at my program.
