Subject: Python reader for IDL save files.

I have two questions:

1. Has anyone worked on the problem of reading IDL save files from within python? This seems like a reasonable project for the usual IDL variable types.

2. The only problem I have thought of is how to represent arrays of IDL structures in Python. The one attempt I made at this was succesful, but the resulting data structures (lists of lists, I think) were very slow to work with. Has anyone worked on this problem?

M
