Hi Rick!

You where right. The object oriented part of IDL uses the "Execute"
feature to resolve and compile new classes
The point is, that I wrote a class that is calling the DLM.

You need to compile (only custom?) classes explicitly to include them in
the save-files. I think is is a field where RSI should provide a
"RESOLVE_REALLY_EVERYTHING" procedure instead of "RESOLVE_ALL" which isn't
very helpfull. Althoug the error message of the VM did not help to find
the cause of problem.

Regards,

Georg
