---

Has anyone sucessfully used a DLM created with the Cygwin family of compilers? I have sucessfully compiled a DLM and it looks like it should work, but when it gets to the point of actually using the DLM, IDL will crash! I've been trying to compile my code with a -mno-cygwin, but that is going to be a lot of work! I'm hoping there is an easier way. Anyway, I'd love to hear even if this is possible (i.e. someone has actually done it) so I don't just spin my wheels.

Thanks!

Joey
