Thanks a lot for your response, Haje. findfile just doesn't find anything, and I have tried specifying the full path. It doesn't work! Thanks for your suggestion on file_search. The problem is I'm using a lot of routines that were written by other people and frequently use findfile in them, so I would have to modify a lot of files if I were to change all of them to file_search.

Do you have any ideas as to how to fix this?

Many thanks again,

Ali
