Hi all,

I was wondering what kind of stuff you have in your idl_startup file.
As you can see below, mine is pretty boring and I was wondering whether
there are nice tricks I am missing out on.

Here's mine:

```
device, retain=2
!EDIT_INPUT=1000
!PATH = $
    EXPAND_PATH('<IDL_DEFAULT>:+ $
    /Users/cgguido/idl:+ $
    /Users/cgguido/src/gdl-0.8.8/src/pro')
```

Ciao,
Gianguido
